Claim 14 (Currently Amended). A kit for a radio controlled vehicle adapted to hold accessories, comprising:

- (a) a base being connected to support posts, a handle and a support clamp;
- (b) the support posts being fastened to the base;
- (c) the handle being mounted to the support posts and oppositely disposed from the base;
- (d) the support clamp being attached to the support posts, and being situated between the base and the handle;
- (e) the base having a holding mechanism for a fuel bottle;
- (f) the support clamp having a holding mechanism for a fuel bottle;
- (g) the base having at least one holding mechanism for a glow plug, and glow plug;
- (h) the at least one holding mechanism for a glow plug being ~~a clip holding mechanism or a screw holding mechanism.~~
- (i) the base having up to eight holding mechanisms for a glow plug;
- (j) the support clamp having at least one to eight apertures for the receiving of tools;
- (k) the support clamp having a slot for receiving a standardly available holder for a glow plug igniter;
- (l) the clamp having a slot for receiving the clip on a standardly available electric vehicle starter.
- (m) a spine having a grasping portion with an elliptical shaped outer part and ridges on the inner surface that conform to the shape of fingers;
- (n) two feet on either side of the spine; and
- (o) one aperture in each foot for the receiving and securing of the support posts.
